Benefits of the BA Foundation Certificate

The Business Analyst role is about linking and liaising. Broader than IT, the BA focuses on solutions in the context of the organization's goals, regardless of whether they utilize technology. The BA role is about meeting business needs and ensuring investment in the right solutions.

The Business Analysis role provides significant business benefits. The BA:

- Reduces costs and increases benefits. It increases the value achieved through the solution to the business problem while actively reducing the cost to implement the solution;
- Is actively focused on reducing costs i.e. reduction in rework; reduction in requirements churn and discovering more cost-effective solutions;
- Increases the potential benefits yielded by the solution i.e. discovery of new business needs or requirements; prioritization ensure focus on value; more effective implementation of new solutions by the business and providing a framework in which an IT team can scale.

Typically a business analysis is all about identifying what works and what doesn't, then making recommendations on how to make changes without derailing anything that is functioning properly. Business Analysis can make companies of all sizes stronger and more resilient in terms of meeting challenges and positioning for future growth.

Fact:

Employment prospects for Business Analysts is excellent

Employment for BA (ICT) has risen by 15.8% over the past 5 years and is expected to continue to grow strongly through to 2017 and beyond.

Fact:

The Average salary for Business Analysts is \$82,000.

With salary ranges from \$70,000 to \$120,000. (www.payscale.com.au)

Fact:

Gain credit into the Diploma of BA upon successful completion of this foundation program.

Financial Disaster Averted by Business Analysis:

Both Ford & GM, on the brink of financial disaster, applied the BA discipline throughout their orgs to re-establish themselves as leaders in their industry.
